Canada is entering a new era of global trade opportunity

The Canadian Trade Expo (CTE) is a premier B2B platform designed to foster strong international partnerships and expand beyond traditional markets.

As a flagship international trade initiative, the CTE connects global industry leaders with Canadian businesses-opening new trade routes, accessing high-value international markets, and creating mutually beneficial business opportunities that drive growth and innovation.

Energy - Oil, Gas, Renewables, Clean Tech

Canada is a global energy powerhouse, with abundant oil and gas reserves, a strong hydroelectric foundation, and rapid growth in renewables and clean technologies. The sector plays a critical role in both domestic consumption and international exports while driving innovation toward a low-carbon future.

Automotive - Vehicles, Parts, Innovation

Canada's automotive industry is anchored by world-class vehicle assembly plants and a robust network of parts manufacturers. With a growing focus on electric and autonomous vehicles, the sector continues to innovate in design, efficiency, and sustainability.

Aviation - Manufacturing, Logistics, Aerospace

Canada's aviation and aerospace industry is internationally recognized for advanced aircraft manufacturing, MRO services, and aviation logistics. Major global players and cutting-edge suppliers contribute to a sector known for precision, safety, and export strength.

Manufacturing - Machinery, Tools, Automation

The manufacturing sector in Canada spans from heavy machinery and precision tools to automated production systems. It supports diverse industries, fosters advanced technology adoption, and fuels exports with high-quality, engineered products.

A large, faint, light-grey maple leaf watermark is positioned in the background of the lower half of the page, behind the Manufacturing section.

Information Technology & AI - Software, Robotics, Digital Innovation

Canada's IT and AI industries are thriving hubs of digital innovation, producing world-class software, robotics, and AI solutions. With strong research institutions and a vibrant tech ecosystem, Canada is a leader in digital transformation and smart technologies

Services - Financial, Professional, Educational

Canada's services sector is the backbone of its economy, encompassing leading financial institutions, global consulting firms, and top-ranked educational organizations. It offers expertise, stability, and global outreach across key knowledge-based industries.

Defense - Technologies, Security, Aerospace

Canada's defense sector integrates advanced aerospace engineering, cyber-security, and next-gen defense technologies. With strong government and private partnerships, the industry supports both national security and international defence collaborations.

Agriculture - Equipment, Food Tech, Export Goods

Canada's agriculture sector combines advanced machinery, agri-tech, and sustainable practices to produce a wide array of export-ready goods. From grains to food innovation, it plays a critical role in global food security and trade.

Construction, Building Material

Canada's construction industry is vital to national infrastructure, housing, and commercial development. It includes a diverse supply chain of building materials, sustainable practices, and skilled trades supporting large-scale projects nationwide.
